

# Pilot Program for the Draft IRMA-Ready Standard for **Responsible Mineral Exploration and Development**

December 2021

# OUTLINE

- Brief overview of the coverage and approach of the IRMA-Ready Standard for Responsible Mineral Exploration and Development
- The public review process
- Pilot program: purpose, benefits of participation

# IRMA is creating a voluntary certification system for mineral exploration and development projects

## 1. The IRMA-Ready Standard

- **Best practice** requirements on 26 topics – a comprehensive and rigorous exploration and development standard
- **Based on the IRMA mining standard**, but will go through its own global multi-stakeholder review process

## 2. A third-party, independent assurance

- Auditors external to the company will evaluate whether a project is meeting the IRMA requirements
- Audits will include input from stakeholders and rights holders
- Audit results will be made public
- Likely to be notable **reduction in time/cost** compared to mining standard assurance

## The IRMA-Ready Standard for Responsible Mineral Exploration and Development

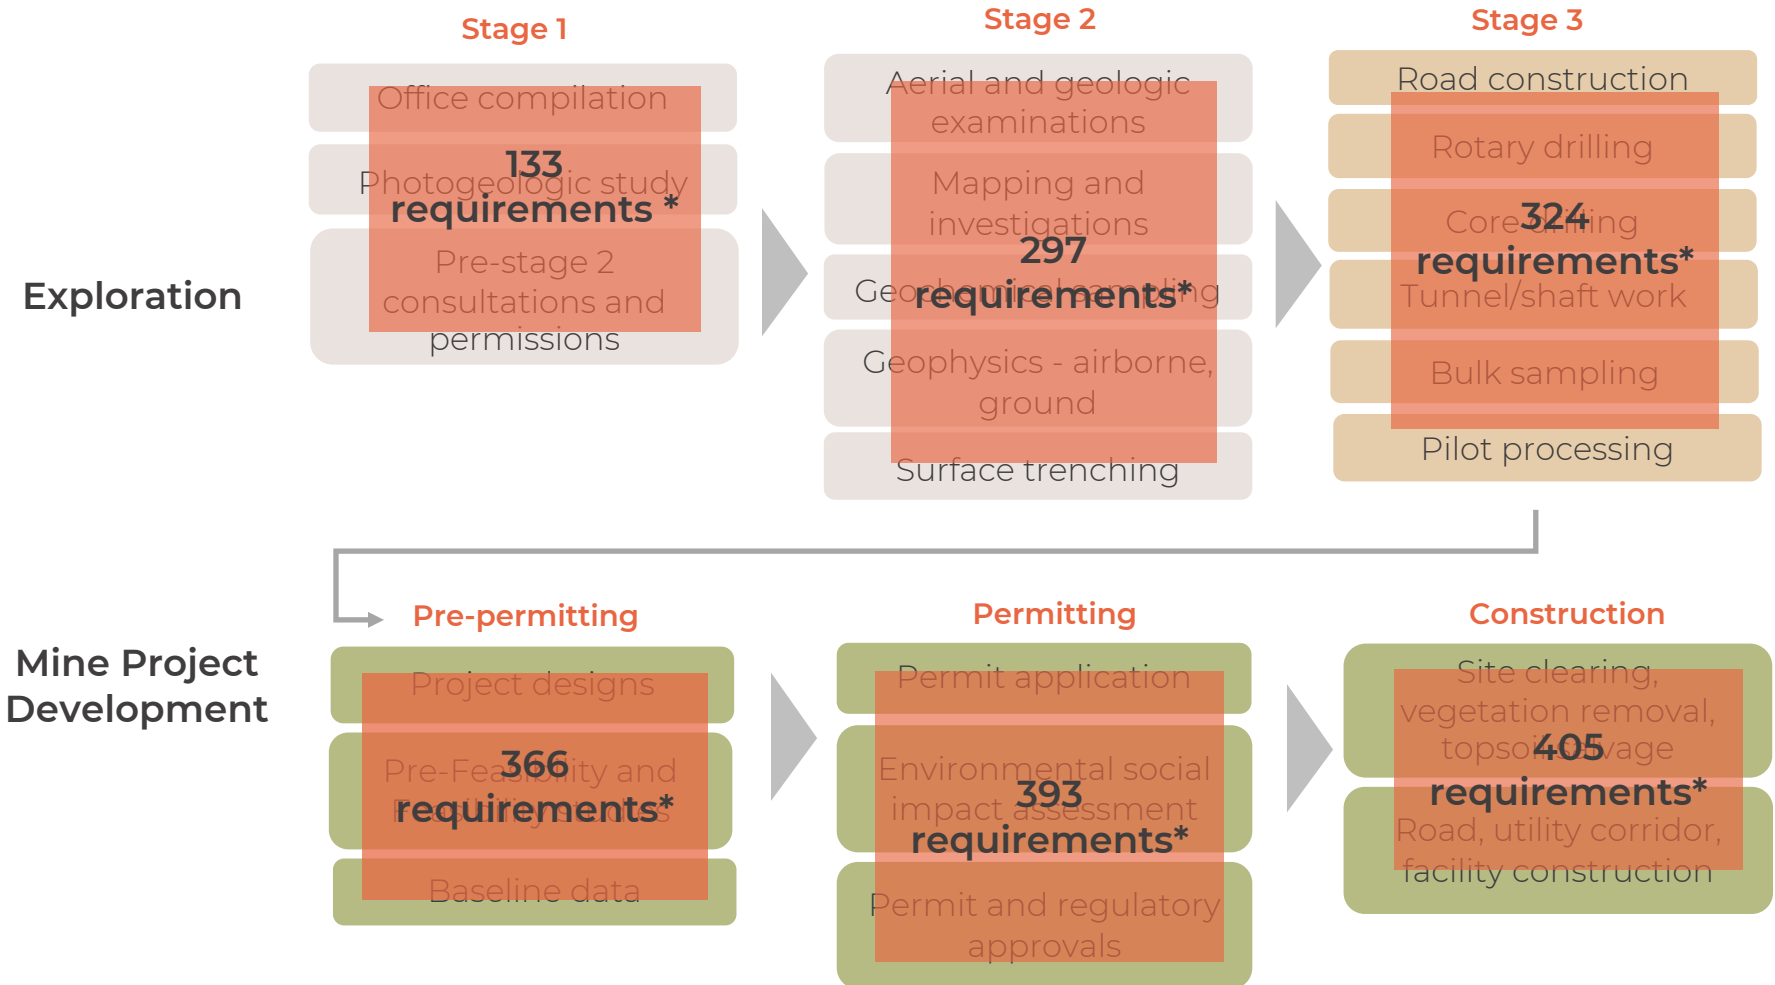

Meant to define best practices for activities that occur prior to the operational phase of a mine.

It is referred to, in short, as the **“IRMA-Ready”** Standard because it is assumed that any project that meets the requirements in the standard will be well prepared to also meet the requirements in the IRMA *Standard for Responsible Mining* if a project becomes an operational mine.

# IRMA-Ready: Why Use It?

- A way for companies to demonstrate, and purchasers, investors and civil society to assess that a company is **striving to achieve best practices** from the beginning of project activities
  - Early phase is the time when **opportunities exist** to avoid culturally/environmentally/politically sensitive areas
  - Best time to **design-in safeguards**, select the best technologies and equipment
  - Appropriate time for free, **prior** and informed consent
- Early engagement important for **building a foundation of trust between companies and stakeholders**, and early awareness and information sharing enables more meaningful engagement and ability of stakeholders to contribute to project decisions
- Evaluating projects against best practices can **differentiate between projects**, inform investment, and contribute to a discussion on social licence to operate

# What is covered in the draft Standard?

\* Actual number will be lower if some chapters not relevant (e.g., FPIC, resettlement, cyanide, etc.)

# The IRMA Standard

## Comprehensive coverage of mining issues

### Business Integrity

- Legal compliance
- Stakeholder engagement
- Stakeholder grievance mechanism
- Human rights due diligence
- Revenue transparency/anti-corruption

### Planning for Positive Legacies

- Environmental and social impact assessment and management
- Free, Prior and Informed Consent
- Community support and benefits
- Resettlement
- Emergency preparedness and response
- Planning and financing reclamation and closure

### Social Responsibility

- Labor rights
- Worker health & safety
- Community health and safety
- Conflict-affected areas
- Security arrangements
- Cultural heritage protection
- Artisanal and small-scale mining (ASM)

### Environmental Responsibility

- Water management
- Waste (tailings) management
- Air quality
- Greenhouse gases emissions
- Noise management
- Biodiversity, ecosystem services, protected areas
- Cyanide management
- Mercury management

## IRMA Ready is based on the IRMA Standard for Responsible Mining:

- Changed mining terminology to exploration, or “proposed” mining projects, or mine construction
- Sometimes reduced level of rigor compared to mining standard
- Sometimes combined requirements to simplify
- In some cases added new requirements (e.g., Chapter 1.5, 2.5, 4.1) to address early phase issues or reflect changes in best practices since Mining Standard was finalized

# Public Review Process

# IRMA Draft Standard Consultation Process

1. Global stakeholders will have **until 15 April 2022** to comment on draft standard
2. In 2022, more webinars offered and possibly working groups
3. IRMA will review comments, revise draft and release for another consultation
4. Finalize the standard based on input

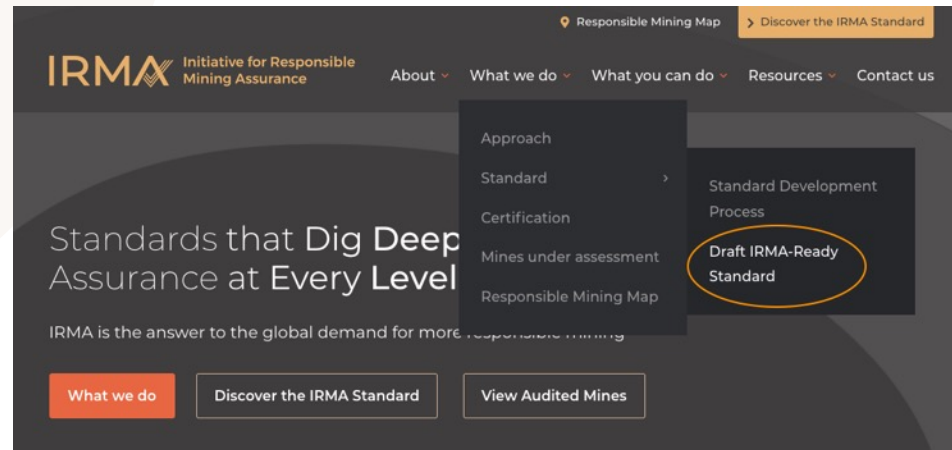

Send feedback to:  
[comments@responsiblemining.net](mailto:comments@responsiblemining.net)

Piloting will occur coincident with public comment period, using Mine Measure self-assessment tool.

No claims of achievement can be made by participants engaged in pilot.

# Piloting the IRMA-Ready Standard

## How can I participate in pilot testing the draft IRMA-Ready Standard?

IRMA leaders invite and encourage the pilot testing of this draft Standard by companies engaged in actual exploration or proposed mining projects, and by stakeholders of existing or proposed projects.

This type of involvement will help to ground-truth the proposed requirements and inform ways that content should be changed and clarified to create value for the diversity of stakeholders who are interested in or affected by mineral exploration and development

Companies or others engaged in the pilot program will test the draft Standard using the [Mine Measure self-assessment tool](#), which has been adapted for the exploration and development stages.

Input from pilot tests will be used to inform revisions to the draft IRMA-Ready Standard.

To participate in the pilot program, please fill out an [application form](#) and send it to: [info@responsiblemining.net](mailto:info@responsiblemining.net)

# Piloting the IRMA-Ready Standard

## Who can participate in the Pilot Program?

- **Mineral Exploration and Development Companies** wanting to review IRMA's draft metrics, provide feedback to IRMA, and carry out a gap analysis against the draft metrics
- **Communities and NGOs** interested in measuring a proposed project against IRMA's draft metrics and providing IRMA with comments on the metrics
- Those not interested or without the information needed to carry out an assessment (e.g., **purchasers, investors, others**) could ask project proponents to participate in pilot program. The pilot assessment tool, Mine Measure, allows answers to be shared with third parties, if permission is granted.

# Piloting the IRMA-Ready Standard

## Step 1: Fill out an Application Form

Application form includes a checklist, to determine the appropriate stage of development.

## Step 2: Send the form to IRMA

info@responsiblemining.net

A	B	E	F
<b>NOTE:</b> If you disagree with the calculated Stage of Exploration/Development, please submit a rationale with your Pilot Project Application.			<b>STAGE OF EXPLORATION/DEVELOPMENT</b>
	Check all that apply		<b>Stage 2 Exploration</b>
<b>Stage 1</b>			
Compilation and review of data (e.g., geologic maps, maps with contoured geophysical results, geophysical profiles, maps showing previous soil sampling results, previous drill hole profiles with assay results, geologic cross-sections).	<input type="checkbox"/> Check if relevant		
Pre-exploration investigations (e.g., review of previous studies, research, non-invasive site visit)	<input type="checkbox"/> Check if relevant		
Pre-exploration consultations (e.g., with individuals, rights-holders, communities that would be affected if exploration work were to be conducted)	<input checked="" type="checkbox"/> Check if relevant		
Application for exploration-related permits/approvals.	<input type="checkbox"/> Check if relevant		
<b>Stage 2</b>			
Aerial examinations (i.e., overflights)	<input type="checkbox"/> Check if relevant		
Mapping and investigations	<input checked="" type="checkbox"/> Check if relevant		
Geologic examinations	<input checked="" type="checkbox"/> Check if relevant		
Geochemical sampling	<input checked="" type="checkbox"/> Check if relevant		
Geophysics - airborne	<input type="checkbox"/> Check if relevant		
Geophysics - ground	<input checked="" type="checkbox"/> Check if relevant		
Surface trenching	<input checked="" type="checkbox"/> Check if relevant		
<b>Stage 3</b>			
Exploration road construction	<input type="checkbox"/> Check if relevant		
Rotary drilling	<input type="checkbox"/> Check if relevant		
Core drilling	<input type="checkbox"/> Check if relevant		
Underground work	<input type="checkbox"/> Check if relevant		
Construction of surface facilities to support underground work	<input type="checkbox"/> Check if relevant		
Bulk sampling	<input type="checkbox"/> Check if relevant		

# MINE MEASURE

responsible exploration/development self-assessment

# Using the Tool

## Step 3: An on-line assessment will be created for you in the Mine Measure self-assessment system

The IRMA Secretariat will create an assessment for your project that includes the requirements specific to the stage identified in your application form.

## Step 4: Start filling the assessment

There is no limit to the number of people who may contribute to the assessment.

The screenshot displays the MINE MEASURE dashboard interface. At the top, the logo and name 'MINE MEASURE responsible exploration/development self-assessment' are on the left, and 'DASHBOARD' and 'LOG OUT' are on the right. The main content area is titled 'Your Account Name' and shows 'Pilot Test IRMA-Ready Stage 2' with a 'One Page Summary' link. Below this, three assessment chapters are listed, each with an 'Edit' button and a note that 'No score is available' because the chapter is not yet completed.

Chapter Name	Status	Action
1.1 Legal Compliance	Score can not be calculated until you complete this chapter	Edit
1.2 Community and Stakeholder Engagement	Score can not be calculated until you complete this chapter	Edit
1.3 Human Rights Due Diligence	Score can not be calculated until you complete this chapter	Edit

# Using the Tool

## Filling out the assessment

If you believe a chapter is not relevant, enter your rationale in the General Comments box, at top of page, and move on to the next chapter.

[View Self Assessment Summary](#)

### Self-Assessment Progress

1.1—Legal Compliance

- 1.2—Community and Stakeholder Engagement
- 1.3—Human Rights Due Diligence
- 1.4—Complaints and Grievance Mechanism and Access to Remedy
- 1.5—Revenue and Payments Transparency
- 2.1—Environmental and Social Impact Assessment and Management
- 2.2—Free, Prior and Informed Consent (FPIC)
- 2.3—Obtaining Community Support and Delivering Benefits
- 2.4—Resettlement
- 2.5—Emergency Preparedness and Response
- 2.6—Planning and Financing Reclamation and Closure
- 3.1—Fair Labor and Terms of Work Requirements
- 3.2—Occupational Health and Safety
- 3.3—Community Health and Safety
- 3.4—Mining and Conflict-Affected or High-Risk Areas
- 3.5—Security Arrangements
- 3.6—Artisanal and Small-Scale Mining
- 3.7—Cultural Heritage
- 4.1—Waste and Materials Management
- 4.2—Water Management
- 4.3—Air Quality
- 4.4—Noise and Vibration
- 4.5—Greenhouse Gas Emissions

## 1.1 Legal Compliance

This chapter has 1 critical requirement.

### 1.1.0 General Comments About This Chapter

1.1.0.1.

#### General Comments on this Chapter

[Save](#) [Remove](#)

#### 1.1.1.1. (critical requirement)

The company shall have a system in place to identify all host country laws that are applicable to the project, and shall track the status of the project's compliance with those obligations.

#### Notes on this requirement

- Fully Meets
- Substantially Meets
- Partially Meets

# MINE MEASURE

responsible exploration/development self-assessment

# Using the Tool

## Filling out the assessment

Users will be able to rate a project's performance

Users can add a rationale for your rating

### 1.1.1.1. (critical requirement)

The company shall have a system in place to identify all host country laws that are applicable to the project, and shall track the status of the project's compliance with those obligations.

▲ **Notes on this requirement**

- Fully Meets
- Substantially Meets
- Partially Meets
- Does Not Meet
- Not Relevant

Notes to Reviewers, and some explanatory notes/footnotes, are added here

## MINE MEASURE

responsible exploration/development self-assessment

### Opportunity to comment on every IRMA-READY requirement

It would be helpful for us to know:

- If you do not believe the requirement it is relevant for your circumstances, or the particular stage being assessed, and why not
- If you disagree that this is an important metric
- If you agree with the intent of the requirement but want to suggest changes to the metric or language
- Other comments

#### Provide Feedback

Please let us know if the requirement is unclear, if you think we are using the wrong metrics, if the requirement is inappropriate for the Stage of exploration or development, or any other input you wish to provide. Suggested changes to language or approach welcome.

# MINE MEASURE

responsible exploration/development self-assessment

## Opportunity to comment on every IRMA-READY requirement

- There will be individual feedback boxes for **Consultation Questions**

### CONSULTATION QUESTION

CONSULTATION QUESTION 4: Is it critical that engagement begin as outlined in the following requirements, or should IRMA allow full points as long as the company can demonstrate that during a particular stage the expectation is currently being met? Or should companies be recognized and rewarded for implementing practices at the time when they can be most effective?

## Benefits of participating in the IRMA-Ready Pilot Program

- Participants will help to inform improvements to the draft standard, so it is an opportunity to help influence the metrics that sites will be measured against if they participate in IRMA.
- The MINE MEASURE self-assessment tool will retain answers. So mining participants will have done some of the work necessary when the final IRMA-Ready Standard is released and integrated into Mine Measure.
- Your comments and participation in the pilot program can be done confidentially, or publicly.

# Benefits of participating in the IRMA-Ready Pilot Program

—You have the option of being on the Responsible Mining Map, showing that your project is participating in the IRMA-Ready Pilot Program (indicate your interest on the application form)

# Benefits of participating in the IRMA-Ready Pilot Program

## Claims:

IRMA will allow public claims about participation in the pilot

- You cannot make any claims that you have achieved a particular score or level in IRMA-Ready. Those types of claims will be allowed once the standard is final, and you have undergone an independent, third-party audit.
- You can state publicly that you are participating in the IRMA-Ready Pilot Program to help contribute to a multi-stakeholder, shared definition of responsible mineral exploration and development.
- You can state publicly and/or on the Responsible Mining Map that once the standard is final you are committed to moving to an independent, third-party audit of your project.

# IRMA-Ready Consultation Timeline

**Comment period:**

**2 December 2021 – 15 April 2022**

**Piloting using Mine Measure:**

**Sign up now!**

**Mine Measure system should be ready before the end of  
December 2021.**
