IRMA Overview

The Initiative for Responsible Mining Assurance (IRMA) envisions a world in which the mining industry respects human rights and the aspirations of affected communities; provides safe, healthy and respectful workplaces; avoids or minimizes harm to the environment; and leaves positive legacies.

Mining is a complex and intensive process that causes environmental and social change no matter where it occurs. Founded in 2006 by a coalition of nongovernment organizations, affected communities, mining companies, trade unions, and businesses using minerals and metals in their products, IRMA has developed a set of standards and a third-party independent verification system to measure social and environmental performance at mine sites globally.

As interest and engagement in IRMA continues to grow, we are now seeking an individual to join our team as the lead staff serving the Finance Sector. This position will work with investors and others in the finance sector to forward IRMA’s vision to provide market value and recognition for responsible practices at mine sites.
