

**On-site, independent audit under the IRMA Standard for Responsible Mining  
Miguel Burnier Mine, Ouro Preto, Minas Gerais, Brazil**

Between August 28 and September 5, 2023, SCS Global Services (SCS) will commence an independent audit of Gerdau's Miguel Burnier Iron Ore Mine operation to evaluate its performance under the Initiative for Responsible Mining Assurance (IRMA) Standard for Responsible Mining. IRMA is a voluntary assessment system that provides a set of best practice standards and participatory stakeholder engagement requirements created to improve mining operations' environmental and social performance.

The third-party, independent audit provides stakeholders, including community members, workers, organized labor, government representatives, and other interested parties, the opportunity to give feedback on the mine's environmental, health, safety, and community performance. SCS will use stakeholder comments to help determine how the Miguel Burnier Mine operation performs relative to the IRMA Standard.

Stakeholders are invited to submit written comments to coincide with the on-site audit. Stakeholders may also contact SCS if they would like to be interviewed. Interviews will take place virtually (telephone or videoconference) or in person. Stakeholder comments, questions, and interview requests can be made through the link below; commenters' identities and remarks are kept confidential upon request.

Upon completion of the Gerdau's Miguel Burnier Mine audit, IRMA will publish the independent audit results and present an overall achievement score: IRMA Transparency, IRMA 50, IRMA 75, or IRMA 100.

SCS is an IRMA-approved certification body with head offices in Emeryville, California. For more information about SCS, please visit [www.scsglobalservices.com](http://www.scsglobalservices.com).

The IRMA Standard is the world's most comprehensive mining standard for industrial-scale mines and the only one equally governed by all stakeholders: mining companies, mineral purchasers, investors, organized labor, communities, and civil society NGOs. Mine site verification under the IRMA Standard is voluntary. For more information on the IRMA Standard requirements and certification, visit [www.responsiblemining.net](http://www.responsiblemining.net).
